Dear Mr. Hedberg:

This letter is a follow up of a phone conversation with members of your staff concerning our comments on the proposed OK Mine near Milford, Utah on 7 August 1996. Our original comments suggested wildlife water sources that could include a pipeline with 3 or 4 water sites over a several mile area as mitigation/enhancement for the mine.

Mr. Rich Havenstrite has contacted our office concerning these comments and felt that one water development 100 yards from the mine fence would not be a problem, but providing and maintaining a pipeline may not be the best solution for providing water in this area. He suggested looking at the water needs in the area and perhaps building other water developments such as guzzlers to provide enhancement. Our office is completely comfortable with this approach and will plan on meeting with Mr. Havenstrite sometime in the future to develop a plan for water developments in the area if the mine plan is approved.

Should you have questions concerning this issue, please feel free to contact Mr. Bruce Bonebrake of my staff at this office.

Sincerely,

Jim Guymon
Regional Supervisor
